

How to Create a Google Alert

You can get emails when new results for a topic show up in Google Search. For example, you can get info about news, products, or mentions of your name.

Create an alert

1. Go to [Google Alerts](#).
2. In the box at the top, enter a topic you want to follow.
3. To change your settings, click **Show options**. You can change:
 - How often you get notifications
 - The types of sites you'll see
 - Your language
 - The part of the world you want info from
 - How many results you want to see
 - What accounts get the alert
4. Click **Create Alert**. You'll get emails whenever we find matching search results.

Here are some alerts I've set up so they come directly to a folder I set up in my email called "Prep All"
